

# THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta. Thursday, June 29th 1944

Pte. L. E. Milligan who has been spending a two weeks' leave with his parents, returned Saturday.

Mr. and Mrs. G. Wanner and family visited with relatives in Acadia Valley Sunday.

Mr. Watson is spending a week at Regina Sask.

Mr. and Mrs. Sherman of Calgary and Mr. and Mrs. P. Sherman and family of Acadia Valley, visited with Mr. and Mrs. Wanner this week.

A Church of England service will be held in the school Sunday evening next at 7:30.

Mr. and Mrs. Ben Mitchell visited last week at the home of the former's mother in Drumhelle. They also visited at Calgary.

Miss Julia Peyton left last week for Brooks, where she will spend the summer months with her brothers.

Born-To Mr. and Mrs. Ervie Blagen in the Esler hospital Tuesday, June 27th a son.

Miss Ethelene Hille went to Drumheller where she wrote off her musical examination last week.

## YOUNGSTOWN NEWS

Miss Mabel Smith of Rose Lynn spent the week end with her father and sister, Mr. Smith and Hazel.

Mr. and Mrs. Hettler returned last Wednesday after spending a week in Wilkie, Sask., where they visited with relatives and friends.

Miss Bessie Armstrong of Berry Creek spent the week end with her parents.

We are sorry to report that Miss Irene Schmitz has been absent from school due to illness.

Mr. and Mrs. Robertson have been visiting in Vauxhall.

Mr. Jack Oshaurne spent the week end at home with his wife and family, returning Monday.

## WHEAT POOL MEETING HELD

A well attended meeting of members and supporters of the Alberta Wheat Pool was held in the Chinook Hotel Hall, on Friday last. Mr. W. Falconer delegate of the sub district, gave a very interesting talk on the history and handling of the local Elevators. Mr. Blair of Naco, the District Director outlined the set up of the new sub districts. He was followed by Mr. Ben Plummer, the Chairman of the Alberta Wheat Pool, whose talk on the Co operative enterprise of the Wheat Pool held the attention of the meeting.

The Moving Pictures amused the children, while the films on the war and bird migration were instructive and interesting to the grown-ups.

## TIME BOMBS

If we do nothing but devise new systems we will simply repeat history. If we create new people we will change history.

The Golden Rule in many cases has degenerated to a rule of brass - do others before they do you.

If we learn to inspire more we will need to correct less.

Tolerance can be just a form of isolationism - minding your own business without caring what happens to the other fellow.

It's the little differences that lead to the big splits.

## New C.P.R. Locomotive Class to be Post-War Model

Engine No. 1200, the first locomotive to be built by the Angus Shops of the Canadian Pacific Railway Company in Montreal to the company's own design since 1931, is pictured above on the trial tracks before being taken over by W. M. Neal, C.B.E., the vice-president, from H. B. Bowen, chief of motive power and rolling stock, under whose direction the engine was built and who worked at Angus Shops as an apprentice in 1905, on the classes of locomotives it will replace.

An entirely new class, designed for that part of the company's program for post-war power replacement dealing with more than 600 of the older locomotives. Engine No. 1200 will go to western Canada eventually, while Engine No. 1201 of the same class, due from Angus Shops in June, will stay in the East.

Responsible for the design of the 1200's was F. A. Benger, chief mechanical engineer (locomotive) and his staff, while the work at Angus Shops was under the control of H. R. Naylor, works manager there, and the supervision of D. L. Thornton, assistant works manager (locomotive). In the picture with Mr. Neal during his inspection, left to right, are Mr. Thornton, Mr. Naylor, Mr. Benger, Mr. Bowen and Mr. Neal. Mr. Neal was particularly interested in the cab, in which he is pictured in the inset, for it was here that 1,500 pounds was lopped off the total weight of the engine by reducing the portion of the cab overhanging the boiler at the back, and by using aluminum instead of steel in the upper structure. The overall weight reduction was from 8,000 to 10,000 pounds on the 1200's compared to the next nearest class in the

C.P.R. power lineup, thereby ensuring the widest running rights over bridges and other restricted trackage.

Material for the construction of the locomotives at Angus Shops was arranged for and work commenced before restrictions upon such material were put into effect. The actual work of building these engines was made to fit in with the general maintenance and munitions program, so as not to interfere in any way with the war effort.

## An Expanding Power

"CANADA IS NO LONGER a small nation, she is a great power, and that has come about not by any political manoeuvring, but by the sheer weight of her war effort." This statement was made by the Governor General, the Earl of Athlone, in an address delivered in Regina, during his recent visit to the West. His Excellency also expressed the hope that Canada's role in the restoration of peace would be "equally sincere, equally substantial, and equally effective." This was a fine tribute to Canada's part in the winning of the war, and one which has been widely appreciated. It is generally agreed that participation in the war has brought the people of Canada to a fuller realization of their abilities and of their importance as a nation, and it is to be hoped that none of this national consciousness will be lost when peace is restored.

## Many Supplies Sent Overseas

Canada's part in the landing of the Allied armies of liberation has been proof of her growing strength, and great credit has been given to all branches of the service which played such an important and effective role in that great undertaking. Manpower, however, was not Canada's only contribution, for according to recent information given out by Hon. James MacKinnon, Trade Minister, an "all out" effort was made to send food and fighting equipment to Britain before the invasion commenced. During the month of May, \$140,240,000 worth of goods was exported to the United Kingdom. In the same month, \$19,864,000 worth of foodstuffs and military supplies was sent to Italy for the great drive which resulted in the capture of Rome and the rout of the Nazis from that area.

## Increase in All Exports

Motorized equipment, locomotives, ammunition, many types of guns, aircraft parts and supplies were among the many articles shipped from Canada for the great Allied offensive in Europe. Large quantities of food were also sent during the month before the invasion began. Wheat shipments during this period were valued at \$45,100,000, as compared to \$25,400,000 in May 1943. Flour shipments reached the total of \$10,300,000; oats, \$12,100,000; bacon, \$21,900,000; fresh beef, \$2,600,000; and dried eggs, \$2,500,000. All these figures show a very substantial increase over shipments in the same month of the previous year, and demonstrate that Canada has indeed provided much material support for the armed forces. We must continue this effort not only in winning the war, but in solving the many problems which will arise in the years to come.

## A Busy Life

The Time of This Weekly Newspaper Editor Appears To Be Fully Occupied

Should you have a notion that the life of a country editor is a cushy one, listen to the lament of one weekly newspaper editor at Viking, Alberta. He writes:

"This week the publisher of this paper is linotype operator, machinist, pressman, adman, jobman, stenographer, bookkeeper and reporter. We are also process issuer, keeper of the records for the income tax branch, the unemployment insurance branch, the Workmen's Compensation Board, the Wartime Prices and Trade Board, the Malta air cadet squadron, and publicity chairman for the Sixth Victory Loan. We attend meetings of the hospital board, sing in the choir, and in our spare time we listen to the tough time the other guys are having."—Maclean's Magazine.

## Blitz Technique On Garden Seeds

Experienced gardeners say that it is very important to destroy weeds when they are small to prevent them from using up the moisture and plant food that should be going to the young and growing vegetables. Hoeing during a bright summer day may not be very comfortable, but it's the right kind of weather for establishing a headstart for further attacks. The enemies of the seedlings in the garden can be kept in check and systematically exterminated with a flick of the wrist if they dare show their heads. Those which are strong enough to resist hoeing manoeuvres should be destroyed before their seeds have had a chance to turn into reinforcements.

## Night Fighter Technique

Cause Of Failure To Interfere With Invasion Preparations

The complete failure of the recent German raids, which attempted to destroy invasion preparations is no mystery. The Air Ministry foresaw long ago that invasion dumps and troop concentrations would make tempting targets, and so set about their preparations accordingly. The cause of the Luftwaffe's failure is the development of the R.A.F. night fighter technique.

## VERSATILE TROOPS

When men and women join the British forces they are taught not only how to handle their particular weapons, how to drive a tank or pilot a plane, repair a balloon or man a boat. They can also learn a trade or profession while they train to fight.

Buy War Savings Stamps regularly.

## Price Control And Rationing Information

Q—I live alone and find a pound of coffee is too much to buy at one time. Is there any way I can buy half a pound, give my grocer one coupon, and buy the other half-pound later on?

A—No, ration coupons are required each time you buy rationed goods. However, you can always buy half a pound of coffee and 2 oz. of tea with one ten-coffee coupon.

Q—My son recently came home on ten days' leave. He brought a ration card with him, but my grocer refused to accept the coupons in it. Can he do this?

A—Yes he can, if you presented loose coupons. All coupons, to be acceptable, must be attached to a ration book or ration card.

Q—My grocer will not accept tea coupons which I still have in my No. 3 book. Is he correct?

A—No, he is quite wrong. All tea coupons in your No. 3 book are still good for the purchase of tea of coffee. They will remain valid until an expiry date is announced.

Q—Are the prices of strawberries and raspberries controlled?

A—Yes, price ceilings for Canadian-grown strawberries and raspberries were set on May 29 and remain controlled until September 30. Canada is divided into three zones, and Manitoba, Saskatchewan and Alberta are included in zone three. Prices for quarts and pints are less after June 17 than they were for the period May 29 to June 17, when the berries were not as plentiful. Imported berries are also placed under the same ceiling as Canadian-grown berries for the period June 5 to September 30.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book (the book in which you keep track of your ceiling prices) mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

## Jap News Unreliable

Soldiers' Relatives Warned Against Messages That Are Not Official

In announcing the Government was forwarding to relatives any apparently genuine message coming from Canadian prisoners in Japanese hands, the Wartime Information Board warned against placing too much credence in Japanese broadcasts.

A W.I.B. statement added: "Such messages may be released by the enemy for some propaganda purpose and their reliability is, therefore, always questionable."

"Sometimes recordings are made of prisoners' voices, but these may be delayed for some considerable time before being released by the enemy. In addition, cases have been reported of unscrupulous persons who listened to broadcasts from Japan, then wrote the next of kin mentioned and offer for a consideration to send them the message that has been sent out."

"Other people, with no ulterior motive, frequently write next of kin to tell them of messages picked up. This is unnecessary, as the official handling of such messages is very thorough and next of kin are informed of all apparently reliable messages that come through, as well as of all other information concerning their prisoner relatives."

"The United States Government has set up a similar organization with respect to American prisoners in Japanese hands."

The willwaw is the name of a strong wind that sweeps through the Aleutian Islands.

## Rhubarb Crisp Pudding

Right now the rhubarb is at its best and most of us are looking for different ways to serve it. We all like rhubarb pie and many of us are satisfied with just stewed rhubarb. But for variety, and a recipe worth keeping on tap for the rhubarb season every year try this rhubarb crisp pudding. This recipe deals gently with your precious sugar supply too.

1/2 cup shortening 1 1/2 cups toasted bread cubes  
1/2 cup sugar 2 cups All-Wheat  
2 eggs 4 cups diced fresh rhubarb  
1/2 teaspoon nutmeg 1/2 cup honey

Blend shortening and sugar thoroughly; add eggs and beat well. Add nutmeg and flavoring. Stir in bread cubes and cereal. Put rhubarb in greased baking pan; drizzle honey over rhubarb. Cover with All-Wheat. Bake in moderate oven (375 degrees F.) 35-40 minutes or until rhubarb is done. Serve warm with this cream.

Yield: 6-8 servings (10 x 6-inch baking pan).  
Variation: Omit nutmeg and vanilla extract; use two teaspoons grated orange rind instead.

## The Next War

Germany Making Plans Even Now For Another Attempt At World Domination

Whenever one hears, and it will be heard, talk of an honorable peace for Germany, the past should be remembered above all things, and safeguards taken. The London Bureau of the Ottawa Journal reports that there is good evidence that the Germans are actually now thinking of and planning how to wage the next war. A significant fact in corroboration of this mentality and outlook is that German scientists have carefully studied the effects of the bombardment of Berlin and other German cities, and are devising ways and means whereby these places may be rebuilt on bombproof lines.

Berlin has announced that at the end of this war all German cities will be constructed of fireproof materials. Every roof is to have its swimming pool, for use in peacetime for exercise and recreation, but in wartime as a reserve of water to deal with incendiary attacks by air. Houses will be constructed of steel and reinforced concrete, and even the household furniture will be fireproof. This is proof, if indeed proof were needed, that the Germans, realizing that they cannot win the present war, are looking ahead to waging yet another and better one.

Those people who refuse to believe in the inherent belligerence of the modern Hun will find it hard to reconcile these facts with their persistent and sentimental incredulity. Nothing could be more certain than that, if we wish to avoid a third Great War Germany, after the present one, must be effectively and permanently demilitarized, not only politically but industrially.

Hitler once boasted of Russia having been laid low for one thousand years to come. It is just something like that which should be the portion of Germany.—St. Catharines Standard.

## Hair Splitting

Human Hair Is Used In Making Cloth In Hungary

Wartime necessities in Hungary have developed a process whereby human hair is combined with rayon and hemp fiber in producing fabrics. Press reports indicate that during the past three years 600 meters of cloth for men's suits have been manufactured, as well as 2,500 blankets, 2,500 sweaters and 1,000 pairs of stockings.

The durability and cheapness of this type of cloth will ensure its use after the war, it is claimed.

## HOW IT IS DONE

"Dr. Hans Tschelch did at the age of 75, in Kiel. His name will always be remembered in connection with the building of German submarines. Even when the inglorious end of the last war put a sudden stop to German U-boat construction, Tschelch managed to go abroad where he continued to design submarines. Thus he was able to develop his plans in undisturbed quietude, and in this way he was partly responsible for making available to Germany in 1935 mature and modern U-boat designs."—Der Neue Tag, Prague.

Modern library methods began with the rule of St. Benedict, early in the sixth century.

## "Gentle way to stop constipation"

"Believe me, you should try ALL-BRAN for constipation. If it has the same cause mine had. For nothing I tried keeps me so regular."

No dosing—no nasty harsh purgatives. Here's all you do—if your constipation is due to lack of "bulk" in the diet. S i m p l y e a t K E L L O G G ' S ALL-BRAN regularly, and drink plenty of water. This nutritious cereal helps to produce smooth-working "bulk," and prepare wastes for easy elimination. You'll like the happy relief so much you'll want to stay regular. Eat tasty, toasty ALL-BRAN daily. Grocers have it in handy sizes. Made by Kellogg's in London, Canada.

## SMILE AWHILE

"Waiter, this is a miserably small steak."

"Yes, sir, but you'll find it will take you a long time to eat it."

"It's an ideal match."

"What makes you think that?"

"Well, he has money and she knows how to spend it."

"I see you raise hogs down here most exclusively. Do they pay better than corn and potatoes?"

"Wal, they don't snort, but hogs don't need no hoin'."

"This man is annoying me, constable."

"But he isn't even looking at you."

"That's what's annoying me."

Mr. Softie—This is my photograph, with two French poodles. You recognize me?

Miss Cane—I think so. You are the one with the hat on, are you not?

Mrs. Fabber—My husband certainly does enjoy smoking in his den? Does your husband have a den?

Mrs. Galsby—No, he grows all over the house.

Employer—My boy, I started out of college with the theory that the world had an opening for me.

Office Boy—And you found it, sir?

Employer—I did. In fact, I'm in the hole right now.

"Ah bet yuh was relieved when yuh found it wasn't a spook foler-in' yuh last night," said Sam.

"Ah was so relieved," replied Rastus, "that ah slowed down to a gallop."

"Yes, I sometimes go to the doctor. Doctors have to live, you know. And afterwards I go to the druggist with the doctor's prescription. Druggists have to live, too. When I get home I pour the medicine down the sink."

"Why?"

"Well, I have to live, too."

Some Yanks in Italy were standing on the edge of Mt. Vesuvius looking at the molten lava. One of them remarked to his companion: "Looks hot as Hades."

An Englishman, near by remarked to his companion: "These Americans have been everywhere."

A lawyer, being interrupted, said: "I will speak, sir, as long as I please."

"You have spoken longer than you please," was the opponent's retort.

REVENGE IS SWEET

BBC says an Italian prisoner of war working on a farm in western England found an exhausted German airman who had taken to the silk, on a heap of turps. The Italian prisoner took the German prisoner. It was no small surprise to the German to be captured by an Italian after landing in England.

## D-Day Brings Three B.C. Friends Together

It took the world's greatest sea-borne invasion to bring these three British Columbia friends together. Before the war they worked in the same factory in Trail, B.C. Gunner Alex Williamson of a Canadian artillery regiment, right, was hit in the arm by a sniper's bullet before his assault craft reached the French beachhead. Brought off again, he was transferred to the Royal Canadian Navy destroyer, H.M.C.S. Algonquin, which was joining in the bombardment of the beach. After the battle had died away, Williamson was visited in sick bay by his two friends from Trail. They are, left, Engineer Artificer John Dawson, of Kimberley, B.C., and Stoker George Foster, of Nelson, B.C. The picture, taken on D-Day, just off the French coast was flown to Canada by bomb-

## GEMS OF THOUGHT

### COMFORT

There is much satisfaction in work well done; praise is sweet; but there can be no happiness equal to the joy of finding a heart that understands.—Victor Robinson.

The disposition to give a cup of cold water to a disciple, is a far nobler property than the finest intellect.—Howells.

A deserved and discriminating compliment is often one of the strongest encouragements and incentives to the diffident and self-distrustful.—Tryon Edwards.

God often comforts us, not by changing the circumstances of our lives, but by changing our attitude toward them.—S. H. B. Msterman.

Whatever things were written aforetime were written for our learning, that we through patience and comfort of the scriptures might have hope.—Romans 15:4.

Father, we thank Thee that Thy light and Thy love reach earth, open the prison to them that are bound, console the innocent, and throw wide the gates of heaven.—Mary Baker Eddy.

Only dust-free air is that over the ocean 600 miles or farther from shore

SHORT STORY—The Honor Of  
Yee Shan Yee

By RALPH ZANCHI

McClure Newspaper Syndicate

Yee Shan Yee placed the package beneath the counter. With a few deft strokes of the brush he marked the ticket.

"Fo' Fliday, can do." His seemed yellow face wrinkled in a smile. But the skin over his cheeks felt as stiff as plaster and his heart was heavy. Surely the white man must see the treachery of this smile.

But Stephen Holiday merely pocketed the laundry check and walked out. This, too, hurt. For fifteen years, ever since Stephen, a young law student, had first brought Yee his laundry, he had always stopped to chat with the old man. But now there was going to be an election and Stephen would become District Attorney. He still brought the laundry; but he no longer talked.

Yee returned to his work, his thoughts racing back and forth as rapidly as the steaming iron he pried, when the doorbell tinkled, announcing another customer.

Yee viewed the lady with genuine pleasure. She was slender with frank gray eyes and an easy, friendly manner. He had approved of her from the start.

"Ho, Missy Alice." He counted out her change. "You an' Mist' Stephen really soon?" Again he forced himself to smile. He had been very happy when the two favorites had told him they were engaged, and had promised them a wedding present. The gift, a beautiful ox-blood bowl a half-thousand years old, was his most cherished possession.

"Oh, yes, I'm so worried," Alice sighed. "The crooked politicians are out to get Stephen. And the closer it is to election the worse their lies are. Steve's behaving like a perfect idiot. He won't marry me until he's cleared himself. A certain gambler is supposed to have given him five thousand dollars, and . . ."

Five thousand dollars! Yee trembled like a willow in a winter wind. "Oh, Missy Alice," he said hurriedly. "Velly busy today."

For the first time in his life Yee closed and locked the door of his laundry in the middle of the day. He retired to the back room where he sat long, his twisted face revealing his inward struggle. Finally he rose and took from a closet his old felt hat and an equally ancient coat. In his pocket he put a document adorned with a large seal. Letting himself out the back door he walked toward the heart of the city, a region he seldom visited.

Calm was in his heart. There would be no more days of shame, no more nights of anguish. For Yee Shan Yee, a man who had been honorable, and lost his honor, was about to regain it.

It had happened a month before. Stephen had brought a package of laundry. The day was hot and he carried his coat under his arm. As he went out a small envelope fell from the coat to the floor. Yee called to him, but Stephen was already boarding a bus.

Yee had examined the envelope—it contained ten crisp new five-hundred-dollar bills!

Yee's first impulse had been to take the money to Stephen. He had worked hard all his life and was honest to the core. He had never cheated anyone out of a copper cash in China nor a copper cent in America. But an idea overpowered him.

Stephen was prosperous. The loss of this money would not hurt him much. But in Yee's homeland, where starving millions were fighting des-

perately for their country, five thousand dollars would accomplish miracles. Yee had sent the savings of twenty years to buy rice for the foodless. He had even sold the cheap photograph on which he liked to play "The Peach that Bloomed by the Bubbling Well," to remind him of his boyhood in Kwantung Province. And the few dollars it brought were on their way to China, also.

Five thousand dollars! He was unable to resist. That evening he mailed it to an address in San Francisco. It was only when he read the receipt thanking him for his sacrifices that he realized he had dishonored himself and—far worse—his country.

Yee Shan Yee did not spare himself now. He told Stephen the facts unemotionally, asked for no pity. "I am a thief," he said sadly. "But I try make fix."

He handed Stephen the document he had brought. It was a life insurance policy for five thousand dollars.

"Fo' you. My family in China all dead. Killed by bombs. Tonight I go to my people. Tomorrow you get five thousand dollars."

"But, Yee, you old mummy," Stephen said, "you've saved my name! That five thousand dollars was marked money that someone slipped in my pocket to frame me. If it had been found when they searched my house, I'd have been ruined. Since you've told me the date you found it I know you put it there. The only man who had a chance that day was Tim Donovan. Now I know he's the brains behind the gambling ring I'm fighting!"

Yee Shan Yee did not understand all this. But he knew that somehow he had taken dishonorable money and made it honorable. As he shuffled back to his laundry his wrinkled face beamed with a blissful smile. He must buy a suitable wrapper for the ox-blood bowl. For Stephen had said when they parted:

"Now remember, Yee Shan Yee. As the guest of honor it's your duty to arrive early for the wedding."

## SAFETY MEASURE

The house of lords has a red-bordered carpet marking the limits where a member may stand when addressing the gathering, and it is believed the carpet was set in the days when men carried swords, so that a safe distance would be allowed in case of altercations.

These are the types of Canadian paratroopers who fought the Nazi to a stand still and helped pave the way to successful Allied operations on D-Day. At the left, one of them goes "overboard" as the camera snaps a picture at a 500th-of-a-second. In the centre is Lieut. R. C. Hilborn, getting his harness checked by Major, the Hon. R. Fraser, before he takes

## About Charcoal

Has Many Uses, According To Reports Made By Scientists

Charcoal is a potent shield against poison gas, according to recent statements made by scientists. An essential part of every respirator is the filter filled with specially-prepared charcoal.

Charcoal helps to control and raise the temperature of furnaces used in many of the processes in the development of armored steel. Six hundred years ago when Roger Bacon, the famous scientist made gunpowder, it was charcoal—mixed with saltpeter and sulphur that he used. Explosives are now being produced that makes the force of gunpowder seem like a twenty-fourth of May firecracker. Nevertheless, charcoal is still used in many explosives.

The nature of charcoal varies according to the wood from which it is made. Hard woods such as oak, ash, or chestnut make the type most in demand today, but softer woods such as willow, produce charcoal that is used by the optical industry in Britain for polishing jobs.

The charcoal burners of Britain cut their own timber from the branches of trees and lay it on a circular hearth they have cleared in the forest. In the centre there is an upright pole, afterwards removed, which leaves space for a natural chimney as the wood pile is built up in a conical form to a height of about 10 feet. When the layers of wood have been placed in this manner, the whole pile is covered with earth and ashes from a previous hearth so that when the wood is set on fire there is only a limited supply of air to help it burn.

When the charcoal burner has finished his work, and taken the charcoal to market it has to be prepared for the buyer by grading it into sizes from lumps of about two inches to dust that will pass through screens of 120 holes to an inch.

The dust, made into bricks, is used in Britain's hospitals in portable enclosed stoves so that food is delivered hot to patients. Such is the versatility of charcoal in wartime service!

## Visual Education

Four New Films On Canada For The Schools

Four new films about Canada, produced by the Erpi film company, have been added to the audio-visual aids library and will be available to Saskatchewan schools at the beginning of the fall term, officials of the department of education announced recently. The films deal with the four different sections of Canada under the titles, "Pacific Province," "Prairie Provinces," "Industrial Canada," and "Maritime Provinces." The films give a "bird's eye view" of the relative importance of various Canadian industries.

In addition to the Erpi films, several new films from the National Film Board of Canada have been placed in the audio-visual aids library. They include films dealing with the Niagara Peninsula, Prince Edward Island, uses of glass in the modern world, forestry, co-operation and the life of the North American Indians.

One-third of the area of the United States is owned by the government.

## Fought Germans To Stand Still

## Job Is Dangerous

Modern War Correspondent Takes Same Risk As Soldier

Dave Boone, in the New York Sun, describes the modern war correspondent like this:

What a difference there is between a war correspondent in this war and in the old days. Now he gets into more tough spots than most of the soldiers got into in the early wars.

When you spoke of a war correspondent years ago you thought of a carefully groomed, highly polished, glamor gent with a tent pretty well behind the front who was a reasonably safe insurance risk.

Today he's just another target for everything that's being thrown. He's a Commando with a typewriter, a Ranger with pad and pencil. He gets everything a 1-A gets, except kitchen police.

The modern war correspondents are no glamor boys with cozy jobs. They're rough-and-tumble, hard-boiled, two-stated fellows who get so hard that bullets bounce off their hides.

## Has Proved Success

Children's Clothing Exchange In England To Be Continued

Wartime necessity in England has developed a scheme that will be maintained after the war to aid the mothers of large families. It is the children's clothing exchange operated by Women's Volunteer services where mothers of children who outgrow their clothes before they are worn out may trade them for other clothing. The plan has worked so successfully that requests are made to continue the scheme after the war.

## SALVAGE

Waste paper is still Canada's foremost salvage need—20,000 tons a month are required. The short supply of waste paper is holding up orders for vital paper products needed in the war effort. Newspaper, wrappings, bags, cardboard, old magazines, corrugated boxes are most vitally needed.

## The Housefly

Is One Of The Greatest Enemies Of Public Health

The common housefly is one of the greatest enemies of public health. It is well-known that dysentery, infantile diarrhea, typhoid, and tuberculosis have been carried by flies and it has been demonstrated that flies may be the possible spreaders of infantile paralysis. They breed in filth, they feed on filth, and pass directly from the foulest of filth to human food, carrying bacteria and particles of decomposing matter on their hairy bodies and sticky feet and mouths. Yet they are tolerated in some homes and in some shops offering human food and fruit for sale.

The most effective method of combating the housefly, is to destroy its breeding places. This is best done through community action involving the proper care and disposal of manure, garbage and other waste materials. A leaflet outlining the methods to employ may be obtained free of charge from the Publicity and Extension Division, Dominion Department of Agriculture, Ottawa. It is especially important to protect foodstuffs from contamination by flies. Doors and windows should be properly screened and flies that invade the home in spite of this should be promptly killed.

## This Week's Pattern

By ANNE ADAMS

As simple to sew as it is fun to sun in, Pattern 4799 makes a dashing playsuit. You'll want the trim jacket and button-front skirt, too.

Pattern 4799 comes in misses' sizes: 12, 14, 16, 18 and 20. Size 16 takes 1 1/2 yds. 35-inch material for the brief top of playsuit and shorts. Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

## INDIAN ARMY MEDICAL CORPS

The Indian Army Medical Corps, which now has 300 major field units, has attached an Army Nursing Service. Women doctors and nurses, as well as men, are eligible for service wherever Indian units are in action. Many new medical schools have been opened.

YOU WOMEN WHO SUFFER FROM  
HOT FLASHES

If you suffer from hot flashes, weak, nervous irritable feelings, are a bit blue at times—due to the functional "middle-age" period peculiar to women—try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Write for a Free Leaflet today. Follow label directions. Worth trying!

## They Learn Fast

Boys Ask Rescued Airmen If They Had Any Chewing Gum

A few days ago, after a rather hectic flight over enemy territory, the crew of a Fortress had to leave their aircraft in the "drink". They made their way ashore in their dinghy, which was far from being a pleasant operation.

As they walked on to the promenade at a South Coast town they were besieged by a host of youngsters who, crowding round, asked the somewhat tired airmen, "Have you any chewing gum, mister?"—Brighton Evening Argus.

## EMBARRASSING MOMENTS—

The sergeant gardener at Currie Barracks in Calgary was hosing the lilacs bushes outside of the officer's quarters recently. Playfully, he threatened to "draw" the next CWAC who dared to appear in the doorway. The threat was hardly off his lips when a khaki skirt appeared on the steps. As good as his word, the sergeant turned his hose with full vent on the offender. His companion knew no bounds when he suddenly noticed a crown on the soaked epaulet of the CWAC and recognized Major Doris Weston, Officer Commanding 113 Depot Company. He apologized profusely. "Oh, that's all right," the O.C. replied brightly, "would've done the same thing myself."

## G. I. BID—

Proof that a soldier is really on duty 24 hours a day was furnished recently by Capt. Patricia Hamel, Officer Commanding a C.W.A.C. unit in Regina, Sask. In the midst of an engrossing bridge game, the officer pondered over her cards, drummed on the table, and finally got ready to bid. "One corporal," she said.

"Miss you," is the theme song of Corporal Dorothy Sage of Saskatoon, Sask., and the object of her affection is a mobile recruiting unit.

"Recruiting unit," as C.W.A.C. recruiting N.C.O. she travelled through the province with the soldiers, gradually adding the duties of "chief cook and bottle-washer" to her own work. Now the troupe is disbanded. Its members have laid aside their musical instruments for the weapons of war. "Who'll darn their socks and sew their buttons?" Dorothy asks mournfully, doubtful that the sergeant-major will be a mother to the boys.

## SPORT—

A good athlete doesn't need to pick her spot or sport as the case may be. L-Cpl. Margaret Young of Kelwood, Man., gave support to this theory at a recent sports program at Fort Garry, Man. Showing all-round ability, Margaret won the 75 yard dash, the high jump, ball throw and running broad jump. To top it all, she aided her team in winning the 60 yard shuttle race.

## JAMAICA CWACs

"Friends and pals forever," sums it up for Beverly Moyston and Everell Jones, who left their homes in Jamaica, last January to enlist in the C.W.A.C. Inseparable in school and in business they saved and planned together until they were ready for the 3,000-mile trip to Toronto, Ont. The girls graduated from high school together and were both employed as stenographers for the Jamaican government prior to their enlistment. They both plan post war study in a Canadian university before returning to Jamaica. Medical social work is the main interest of Pte. Moyston while Pte. Jones is hoping for a course in business law.

Mace is a spice found in the filament between the two hard shells of a nutmeg kernel.

Jeeps equipped with light blades are serving as snow plows in the Canadian army.

CLASSIFIED AD

SIRAYED

One Sorrel Saddle Pony has white hind feet. No visible Brand. At Ray J. Robinson's farm, south of town. Finder can have same by paying for advertisement.

LOST

ONE — BLACK MARE with two white hind feet, star in forehead 1,450, no brand. \$500 Reward to any one whom can give information where to find same.

Letter Received From  
Mr. Jackson.

Your correspondent received an interesting letter recently from Joseph Jackson who homesteaded in the Heathdale district and now farms at Cassils, Alta. Joe says crops are good in the Irrigated district.

The eldest boys, Norman and Lawrence are both overseas with the Canadian Forces, Cathleen is a L. A. W. in the Air Force, stationed at Camp Borden, Ont. This family has inherited some of the combative spirit of the father, who served throughout the last war and won the distinguished Conduct Medal, in France.

Mr. Jackson and family lived south of Chinook for a number of years.

Rodeo Days Are  
Here Again

Rodeo days are here again. A large crowd gathered at the Callahan ranch and saw some good performance, put on by our local broncho busters.

Henry Schmidt and Skipper really left the chutes hurriedly and took home some money. Hugh Wilson and Sky Rocket put on a lively show while Gordon Anderson and Mousie got into a tight squeeze. M. Coates and Pinto Pat went on high, but they landed hard on the pale corral. Other riders who did their bit and did it well were: Jack Gingles Ed. Davis, E. Peterson, Art Pfeifer and N. Callahan.

Jack Gingles and Clifford Peterson ably attended the Chutes.

Cliff's thumb would get in the way tho, some times Chinook is proud of her cow boys and looks forward to the next which will be held at the Callahan Ranch.

Miss Randale, Primary teacher, left Wednesday to attend the wedding of Miss Isabelle Tait, formerly of Cereal. She was also going to Blackie, where she will attend the anniversary of her parents' wedding.

We did it at VIMY...and ORTONA-

WE'LL DO IT AGAIN—  
but we need YOUR HELP!

WEAR IT ON YOUR ARM

Yes, we need your help...and need it badly. This is the biggest job we have ever tackled! Everything depends upon Victory. Canada's Army needs volunteers NOW. And, that means you and you and you!

Wear Canada's Badge of Honour on your arm. You'll be proud of it, so will your friends.

Every man who is able has got to do his bit!

Maybe you don't think this means you... that it's a job for the other fellow.

If you do, you're wrong. It's your war, too... a war for every man who is a man... for everyone who has a stake in Canada.

Yes, this means you all right and we need you now for the months of intensive training to make you fighting-fit. We did it before and we can do it again... but we need your help.
